

The National Medal of Science is engraved to match the curvature of the medal design

Multiple level engraving with color fill in selected areas adds sparkle to this brass plaque.

The costs of truly professional engraving are small in relation to the recognition of the recipient.

Medallic Art Engraving Services Expertly & Artistically Add Personalization to Any Medal or Plaque.

In its simplest form engraving brings to mind the inscribing of a name or dedication on a medal or plaque. While this is the most common form of the art, there are much wider applications available when you trust your engraving to Medallic Art Company.

Basic engraving does not have to be shallow scratches on the surface of an award—our engraving is satisfyingly deep and lasting; each character is finished in relation to the contours and variations of the surrounding area.

Logos and artwork can also be carefully engraved allowing infinite design possibilities.

Our Recognition Consultants and Design Department will be happy to work with you to meet your individual requirements.
